

## March Rally Official Rallye Results

There are some changes. Some caused by trying to hand check 29 score sheets and others caused by math and score sheet errors.

A little about scoring. If the score you see here does not match what you turned in, there was an error on your score sheet. Errors fall into two categories, math errors and using the wrong in, out or true times. By rule, if you make a mistake we cannot correct the error in your favor. For example, if you turned in a score of 300 and when checked your score should have been 200, you get the 300 points. If you turned in a score of 200 and when checked your score should have been 300, you will receive the 300. Math and completing the score sheet correctly is all part of the game.

We could use the computer to check the scores at the end of a rallye but that would take a long time. Most folks don't want to wait around an hour or more after they turn in their turn in their score sheet.

Kudo's to all who participated these were the best most readable score sheets that I've seen in a long time. All of them were readable and the number of errors was very small. That made my job so much easier. Thank You.
